

**Project Design Phase-II**  
**Solution Requirements (Functional & Non-functional)**

Date	01 November 2023
Team ID	NM2023TMID04550
Project Name	Create a Google Business Page

**Functional Requirements:**

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through mobile number Registration through Gmail
FR-2	User Confirmation	Confirmation via OTP Conform by clicking not a robot
FR-3	User Manual	Navigate to home page click on predict on the top right corner
FR-4	User Feeding	Choose the image from document Click on predict to get the output
FR-5	User Output/Final Prediction	The predict output will be displayed

**Non-functional Requirements:**

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	<b>Usability</b>	The usability of this software is User-friendly, easily accessible, Intuitive, Customisable and Efficient.
NFR-2	<b>Security</b>	The software must meet security standards and provide effective protection against threats.
NFR-3	<b>Reliability</b>	The software should be reliable, operating as expected, and minimizing the risk of errors or downtime
NFR-4	<b>Performance</b>	Software performance ensure the better user experience and minimize the cost factor.
NFR-5	<b>Availability</b>	This software can remain operational even in the event of software and hardware failure.
NFR-6	<b>Scalability</b>	The project should be able to scale up its processing power and meet increasing demands, especially in handling a large number of businesses and users.
